Air & Gas Leak Viewer

Handheld Compressed Air Leak Detector

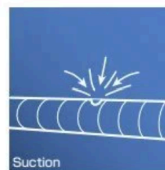

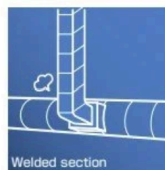

Detects ultrasonic waves from compressed air leaks with array sensors. You see the sound pressure map overlaid visual image.

WHAT WE DO?

Visualizes gas leak points and contributes to energy savings. In addition to selling measurement equipment, we also provide measurement services by our engineers. Based on the measurement report, we took measures to improve the leakage from the air piping and installed the compressor. This contributes to lower operating rates and lower power consumption.

USE EXAMPLES

- Detect gas leak from pin-holes created by corrosion on pipe.
- Detect gas leak from regulator joints.
- Detect gas leak from welder air-tube.

*Type of gases does not matter if it is air, steam, nitrogen, argon, or any other kind of gas!

OUR SERVICES

1 Day Check and Report

Gas Leak Viewer innovation that makes detecting invisible gas and air leaks easy.

Maintenance after check

We have engineering teams to support you repair leaks and replace parts.
